

Medical SOAP Report

Name	johnson
Age	35
Gender	Male
Patient ID	A10234
Report Date	11-12-2025

Subjective

- Reports high fevers and shaking chills
- Describes symptoms as "flu like but much more intense"
- Expresses general malaise ("feel awful")

Objective

- Patient self
- reports febrile illness with chills
- No physical exam findings documented

Assessment

- High likelihood: Systemic infection (malaria/bacterial sepsis)
- Moderate likelihood: Severe influenza
- Low likelihood: Non infectious inflammatory condition

Plan

- Urgent recommendation for emergency evaluation
- Supportive care: Hydration, rest, fever management
- Home monitoring: Temperature checks q4h, symptom diary
- Red flags: Confusion, difficulty breathing, persistent fever >104°F
- Follow up: Immediate ED visit, PCP follow within 24 hours
