

Medical SOAP Report

Name	johnson
Age	35
Gender	Male
Patient ID	A10234
Report Date	09-12-2025

Subjective

• Reports fever • Reports headache • Reports cough • Reports body weakness • Reports slight head hurting

Objective

• Self-reported fever (no specific temperature) • Self-reported headache • Self-reported cough • Self-reported generalized weakness

Assessment

• High likelihood: Viral upper respiratory infection (common presentation with fever, cough, headache) • Moderate likelihood: Influenza (seasonal illness with systemic symptoms) • Low likelihood: Bacterial infection (no purulent symptoms reported)

Plan

• Supportive care: Rest and increased fluid intake • Medications: Acetaminophen or ibuprofen PRN for fever/pain • Home monitoring: Temperature checks twice daily • Red flags: Seek care for fever >103°F/39.4°C, difficulty breathing, or confusion • Follow-up: Re-evaluate in 3 days if no improvement or if symptoms worsen
